pH / Total acidity	3.28 / 7.2 g/L
Residual sugar	3 g/L
Harvest dates	September 21 and October 10
Soils	Honeoye loam over limestone
Trellis	Vertical shoot positioning

VINEYARD & VINTAGE

All components come from Limestone Springs Vineyard in Geneva, on the northwest side of Seneca Lake. A very mild winter was followed by excellent fruit set and a warm growing season with little disease pressure. Grapes were harvested in excellent conditions: Gewurztraminer and Valvin Muscat on September 21, and Riesling on October 10.

WINEMAKING

Substantial sorting took place both in the vineyard and on the crush pad. Valvin Muscat and Gewurztraminer received extended skin contact in the tank press. The components were blended after fermentation.
